

MEN BEWARE: THE FEM-MINISTRY IS COMING!

Mark Wilson, a career journalist, stands alone in the year 2040 against the female government's conspiracy to eradicate the male gender. He rallies broken men, raises their spirits and leads them into battle against the Fem-Ministry.

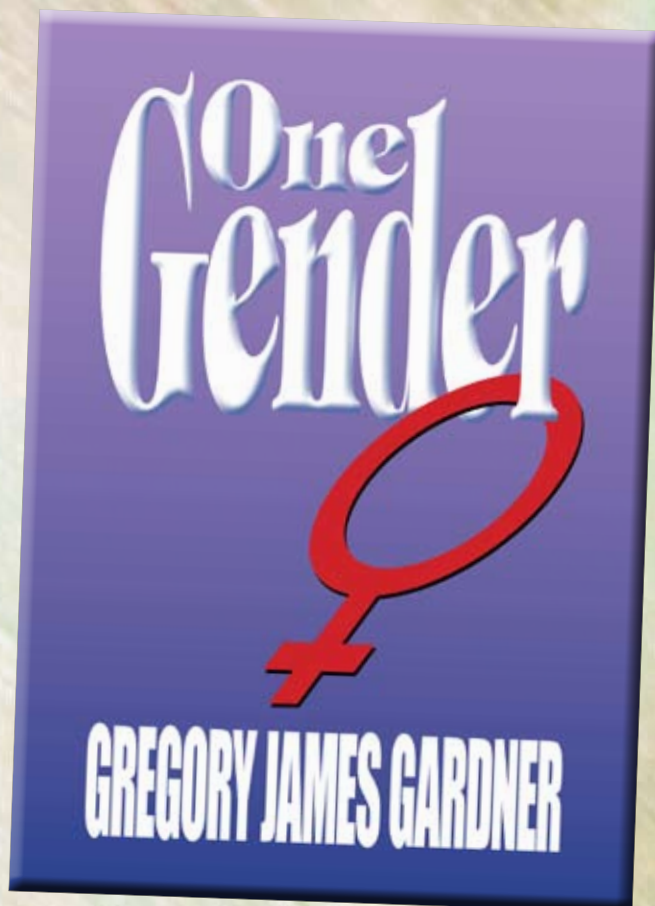

This novel combines the strength of the human spirit, where one man overcomes injustice against intolerable odds, as depicted in Bryce Courtney's book, *The Power of One*, with a frightening scenario, speculating a future oppressive society, as in George Orwell's novel, *1984*.

The novel aligns itself with changes occurring in our rapidly-transforming culture and although the story is fictitious, it provides a plausible account of things to come.

This book is thought provoking and controversial. It aims to alert the reader to current social issues and has the potential to inspire, raise emotions and encourage discussion. It is a relevant topic for today and into the future.
